Member of American Association of Nurserymen and Other State and Local Organizations to Promote the Cause of the Industry

Our nurseries are located at Semmes, on highway 42, fifteen miles northwest of Mobile. We have over 14,000 square feet of greenhouse space for propagation only. All these greenhouses are equipped with concrete benches. We have more than 60,000 square feet of hotbed space for growing small plants in. We use most of these for Azalea liners, all equipped with an automatically controlled heating system. We have nearly seventy acres under overhead irrigation where we grow thousands of liners as well as field-grown Azaleas and Camellias. We would be happy to have you visit our nursery and will always have someone to show you around.

Our Business Terms

Prices. All prices are net and when cash accompanies the order, no charge will be made for packing. Otherwise a charge will be made for packing based on cost.

CARLOAD OR TRUCK ORDERS, where we do not have to crate the plants, will carry a 20% discount from catalog prices on B&B stock providing cash accompanies order. We cannot allow this discount otherwise. This discount not allowed on liners or any bareroot stock.

Charge accounts. From unknown persons who have not established credit with us, we ask for well-known trade reference and time for investigating. All accounts are due on receipt of invoice unless other arrangements are made when order is filled.

C.O.D. Shipments. Must be accompanied by 25% deposit and will be considered as cash shipments. If you want us to hold certain items for you, we require a deposit of 25%.

Shipments. Please specify by what method you want your order shipped. We will endeavor at all times to send out all orders as near the date specified as possible and will do everything in our power to insure satisfactory delivery to our customers, but our responsibility ceases upon delivery to carrier in good condition, insofar as damages in transit are concerned. However, we are here to please our customers and will at all times do all we possibly can to help, should you have to file claim for any damages.

If you have any reason to complain, or if there is any mistake in the order, please let us know at once so that we can rectify the mistake.

It is to be thoroughly understood that we accept any and all orders with the provision that they shall be void, should any injury befall our stock over which we have no control. All orders are subject to any new Government regulations.

Reference. As to our standing and responsibility, we refer you to any bank or business house in Mobile, as well as the better known nurserymen and florists in this country.

WHEN CASH ACCOMPANIES ORDER AND IS PICKED UP
AT NURSERY WE ALLOW 20% DISCOUNT ON B&B STOCK.

AZALEAS •

THIS year we have a wonderful lot of Azaleas to offer, mostly field grown plants. We have increased the area of our sprinkler system and with the addition of this water we are growing some beautiful plants. They have a wonderful root system and the foliage is excellent.

Azaleas can be moved almost anytime during the year, but for best satisfaction it is much better to get your plants before they start blooming. You will get the benefit of the blooms the first year and they will make a better display for your clients.

For nurserymen and growers we are offering this year a million and a half Azalea liners. We keep them growing all winter in our heated frames in specially prepared soil. They are well rooted and branched for spring delivery. We usually start shipping these liners about the last week in March, but for greenhouse operators where space is available it is better to get them in early February. Because of the quality of our plants and the very low price at which we are offering them, we are usually booked up early in the season. We urge you to order early.

A block of Indica Azaleas in open field.

20% "CASH AND CARRY" Discount Allowed on All B&B Stock.

AZALEAS •

KURUME AND PERICAT AZALEAS

These are most popular, as they are used extensively as pot plants and also in landscaping for borders as well as mass planting in beds. As a pot plant there is nothing we know of that is superior. We urge you to try a few if you are not already using them.

Christmas Cheer. Hose-in-hose; small deepest red. Small foliage; compact growth.

Sweetheart Supreme. Salmon-pink. Keeps well. Very fine.

Coral Bells. Hose-in-hose; small, bell-shaped flowers of a beautiful shade of pink. Small glossy foliage; very compact growth. The favorite of florists for pot culture. We have excellent liners of this variety.

Hexe. Hose-in-hose; large, deep red. Excellent dwarf compact growth. Very much in demand.

Hexe d' Saffalare. Hose-in-hose similar to above except larger. New and very popular.

Hiawatha. Hose-in-hose. Large, dark red. Compact plants.

Hinodegiri. This is a very popular bright red variety. The blossoms cover the plant in such a manner that you can hardly see a leaf when in full bloom. Compact, slow growth. Very hardy.

Mme. Pericat. Hose-in-hose; large, light pink flower. Late bloomer, fast grower and very showy.

Mme. Pericat Sport. Beautiful rose - pink sport of Mme. Pericat.

Pink Pearl. Hose-in-hose; pale pink, fading white at center. Profuse bloomer. Early.

Salmon Beauty. Hose-in-hose; large, salmon color. Compact growth. Very showy plant and an excellent variety for pot culture.

Snow. Hose-in-hose; pure white flowers cover the plant. Fairly large, dark green leaves. Very popular with the florist.

Coral Bell liner and 8-12 inch Camellia liner in 3 inch pot.

INDICA AZALEAS

These Azaleas are the most showy of all in the gardens of the South. The blossoms are larger and the plants grow much faster, making very large specimens in a few years' time. They are wonderful shrubs for landscape use, with dark green foliage all during the year and beautiful flowers in the spring. You can be assured that when you plant an Indica Azalea garden for your client, if you do a good job you will have his gratitude for all time. Then, too, these plants can be grown in much colder climates than was thought a few years ago.

Fisher Pink. Light pink. Blooms about the same time as Pride of Mobile. Very good, compact growth.

Formosa. Large purple flowers, somewhat lighter than Phoenicia. Large, thick foliage; probably the fastest grower of all the Azaleas.

George L. Taber. A sport introduced by Glen Saint Mary Nurseries. Fast grower, light green foliage. Pink and white variegation.

Judge Solomon. A pink sport of Formosa. Same growth and blooming habits.

Mrs. G. G. Gerbing. New all white sport of Geo. L. Tabor, brought out by Gerbing Camellia Nursery. A very good white that is much in demand. Quantity limited.

Pride of Mobile. Beautiful watermelon pink—probably the most popular of all Indicas. Large foliage; fast growth, similar to that of Formosa. In Mobile there are plants nearly 100 years old that are still blooming profusely. The blooms so completely cover the plants at the height of the season that scarcely a leaf is to be seen.

Our 10-12 inch and 12-18 inch are all field-grown and are very nice.

Southern Indica Azaleas for Landscaping.

Hot beds where we grow Azalea liners. These beds are equipped with a hot water heating system for protection, which assures you of getting the very finest in Azalea liners.

Lath house scene showing thousands of our Camellia liners. These beds are made up of about one-third peat moss and the plants develop a wonderful fibrous root system.

Camellia Japonica

THESE beautiful aristocrats of Southern gardens are each year gaining more in popularity than any other shrub known. The various Camellia shows that are being held each season all over the country bear evidence of this, and part of the credit for the popularity of the Camellia is due to these shows.

There is and always will be quite a lot of argument in regard to Camellia names. We are listing each variety by the accepted name used by the majority of growers. No doubt some of these will be changed in the years to come as some are being changed now, and when this happens we will always list each variety by as many names as we know it to be sold under. This will prevent you from duplicating varieties.

We are trying to grow all of the better varieties, and not trying to introduce a lot of new seedlings that are good only for understock. We hope to increase our list of varieties as long as we can find new ones to buy that we believe are worth growing. We use several thousand plants each year for understock and we also sell plants for understock, so we use the poorer flowering sorts for this purpose. We also use many *Camellia Sasanqua* for understock and find it sometimes works better than *Camellia Japonica*.

This year we cannot recommend too highly our lining-out grade. These plants are about the finest we have ever grown and we feel that you should get them as early as possible.

Although we plant this size direct to the field and in open beds under our sprinkler system, it might pay you to grow them in partial shade similar to lathhouse for one year.

All of our Camellias are transplanted many times and have a wonderful root system. We are sure you will find none better anywhere, and once you use some of our plants you will like them. We know you can please your customers with them.

We are listing our Camellias in groups for convenience in pricing. The scarcity, demand, and quality of the blooms determine the group they are listed in. We are not in position to offer liners in all groups, but will as soon as our stock will permit.

Standard Camellias

GROUP I

Colonel Firey. Very double, well-shaped flower, 5 to 6 inches across, of brilliant crimson. One of the best red Camellias. Said to be true C. M. Hovey.

Debutante (Sara C. Hastie). Large, peony-form, light pink blooms; early. Fast grower with large, serrated leaves of dull green. Very desirable.

Elegans (Chandleri). Rich cherry-red with white variegation. Large flower, 5 to 6 inches in diameter, some of loose peony form and others with thick peony flowers, all on the same plant. Leaves are rich shiny green.

Goshoguruma. Single, deep velvety red with golden stamens. Medium-sized, full green foliage. Slow, very upright growth.

Governor Mouton. Blood-red, often with white blotches. Spreading growth, with twiggy branches.

Herme. Large, semi-double to peony-form flowers of pink, white and red variegation. Faintly fragrant; an excellent garden variety. Liners only.

Kumasaka. Large, semi-double, deep pink, showing stamens. Good growth and bloom.

Laurel Leaf. A very large full double variety of beautiful texture; incurved petals. Most flowers have rose-pink centers and fade into deeper pink at edge, but sometimes come with white blotches.

Mrs. Charles Cobb. One of the darkest red Camellias we know—almost black. Rich golden stamens intermixed in petals. Very fast grower with rounded light green foliage. We highly recommend this variety.

Margaret Higdon. Large, semi-double, pink bloom, fading to almost white around edges of petals, with stamens intermixed. Large foliage, somewhat serrated.

Mathotiana Rubra (Purple Emperor; Purple Dawn; Wm. S. Hastie). Very large, deep red flowers turning purple as they age, and showing stamens when fully open. Fast grower with large, dark green foliage.

Mathotiana Variant (C. M. Hovey). Very large-flowering type, similar to Purple Emperor except for white through the flower. One of the very best in flowering as well as growth. Large, dark green foliage with some variegation.

Victor Emmanuel. Unusually large, peony form, very deep red. Excellent grower and late bloomer. We have some exceptionally good buys in this variety.

PRICES OF STANDARD CAMELLIAS

GROUP I	Each	100
6 to 8 in liners, bare root	\$30.00
8 to 12 in liners, bare root	40.00
12 to 15 in liners, bare root	50.00

24 to 30 in. specimen	5.00

A field of 18-24 inch branched Camellias. We have many thousands of these plants this size and also one and two years older.

Transplanting in one of our lath houses. Our beds are well prepared with enough peat moss to insure a well developed root system.

GROUP II

Brilliant. Local name. An excellent variety. Large, very double, bright red. Compact grower with dark green foliage.

Duc de Orleans. Creamy white with specks of pink, peony form. Fast grower.

Elizabeth. Very double, white flowers, sometimes showing pink. Excellent grower.

Fanny Bolis. Very large, almost single, red flowers blotched with white. Large, dark green foliage; good growth.

Glorie D' Nantes. Medium size, dark red, semi-double with very large dark green foliage.

Jarvis Red. Large, semi-double, deep red flower with the stamens showing very prominently. Dark green foliage.

Mme. Adele. Large, rose pink, peony form bloom of very loose construction, with yellow stamens intermixed.

Monarch. Very large, deep pink with white variegation. The stamens are so intermixed that often one single flower will resemble a bouquet. Very compact; dark green foliage.

Pink Perfection (Frau Minna Seidel). Very

popular shell-pink that is early and blooms very freely.

Prince Eugene Napoleon (Pope Pius IX). Large, double red flowers. Good growth; light-colored foliage. Very popular.

Professor C. S. Sargent. Crimson flowers of peony form. Excellent grower, early blooming.

Sarah Frost. One of the most common and hardiest of this section; always gives some flowers. Rose-pink, of medium size. Very compact-growing plant.

Semi-Double Blush (Celtic Rosea). Beautiful, semi-double, light pink blooms fading to almost white, with yellow stamens. This is an excellent garden variety.

Rare Camellias

Davis Rose Dawn. A very beautiful rose-pink Camellia of large size, introduced by one of our local nurserymen. Very vigorous grower with dark green foliage. Much in demand. 18 to 24 in. and 24 to 30 in.

Empress (Lady Clare). Very large semi-double flowers of a deep rose-pink color. 18 to 24 in.

Gigantea. Very large red and white flowers of peony form. 18 to 24 in.

Victory White. Very large blooms of pure white with numerous stamens and petalets. 18 to 24 in.

White Empress. Pure white flowers with broad petals and yellow stamens. Semi-double. 18 to 24 in.

24 to 30 in., B&B	7.50

This is a scene in one of our lath houses where several beds of Sasanquas are being planted

Camellia Sasanqua

THESE handsome flowering evergreens offer a wonderful opportunity to nurserymen all over the South. They grow and do well in sections where *Camellia japonica* is a failure, and can be used for screens and hedging, trimmed or otherwise, while the individual plants make fine specimens.

Nurserymen in the vicinity of Fort Worth, Memphis, Birmingham, Atlanta, and all up the Atlantic coast-line and most of the Pacific Coast will be doing their clients a great service and will be well repaid for lining out some of our liners of Sasanqua. They make a much better showing than ordinary broad-leaved evergreens and shrubs, even when not in bloom, and when they come into flower they will add distinction to any garden.

We have heard reports from certain sections of the country where *Camellia japonica* does not do so well, that grafting on *Camellia Sasanqua* enabled these nurserymen to grow many varieties of japonica. This was not where the temperature prevented the growing of japonica, however. We do know that most Sasanqua will stand more abuse than any japonica. We have seen them grow in wet ground where japonica would not grow. We are using more and more *Camellia Sasanqua* for understock each year. The demand for it as understock has increased considerably in the last few years, almost depleting the supply of sizes suitable for landscape use. We advise you to cover your needs on this item as early as possible.

Camellia Sasanqua, Annette. A two-toned variety, similar to Cinderella except more dense in growth and flowers are a deeper pink.

Camellia Sasanqua, Cinderella. Very fast grower of pyramidal habit. Flowers are single, two-toned, white in center shading to pink at edges of petals.

Camellia Sasanqua, Dawn. Hardest of all Sasanquas. Semi-double white with flesh pink at the margins of petals. Slow grower but very desirable.

Camellia Sasanqua, Daydream. Flowers are extremely large, white at the base, shading to deep pink at the outer edge, with a beautiful cluster of golden yellow stamens in center. Excellent for hedges or screen work.

Camellia Sasanqua, Maiden Blush. Fast grower. Medium size, single of delicate pink. Liners only.

Camellia Sasanqua, Rosea. Single, large, rose-pink flower. Very fast grower. Liners only.

Camellia Sasanqua, Texas Star. A new variety introduced by Mr. Price Magee, a Louisiana nurseryman. Very symmetrical growth and very dense. Medium size light pink flower. Liners only.

Inside one of our propagating houses. Note the heavy roots on the Magnolia cuttings

Oriental Magnolias

Our stock of these fine Magnolias is much larger than ever before, and they are about the nicest we have ever seen anywhere. Our liners are especially nice and we recommend them very highly. Most of these Magnolias are hardy in nearly all parts of the United States, and make beautiful trees for Spring flowering.

All liners are shipped bare root and we recommend shipping the larger sizes in this manner when the distance is very great. They can be moved safely in this manner, and can be shipped where B&B would be almost prohibitive.

All our Oriental Magnolias should be shipped out before February first. They come into flower and growth buds soon after and would be harder to transplant. If you have some place like a bulb cellar where you can keep them above freezing, yet cold enough so they won't start new growth, you can hold them fine. 38 to 45 degrees is about perfect.

Magnolia Rustica Rubra. Large flowers of dark reddish purple. Very fast grower and excellent variety. Later bloomer than Soulangeana.

Magnolia Soulangeana. Very hardy, fast growing, and one of the most sought-after plants for use all over the United States.

M. Soulangeana nigra. Dark purple. A late bloomer and not quite so hardy as Soulangeana.
